PROJECTS

Human Resources Management System

- Development of user and admin dashboards.
- Implementation of employee attendance tracking and data management.
- Inclusion of leave data management and employee details within the system.

Hospital Management system

- My primary focus was on the design and user experience aspects of the application, where I leveraged the power of Figma to create visually appealing and intuitive user interfaces.
- I was responsible for translating complex functional requirements into elegant and user-friendly designs that catered to both patients and healthcare professionals.
- In addition to the design work, I took charge of frontend development using the Angular framework. This involved translating the approved designs into fully functional and responsive frontend pages.

Codextra protech/website frontend

- Developed and maintained the company website using Angular, resulting in a user-friendly and interactive online platform.
- Designed and created captivating UI mockups and prototypes using Figma, translating them into functional web interfaces.
- Integrated smooth animations and transitions to enhance user engagement and create an intuitive browsing experience.
